I. Introduction

Brief history of the company

Cyberlogic was founded in [year] with a mission to help businesses harness the power of technology. With over 27 years of experience as a Managed Solutions Provider in the South African market, Cyberlogic has built a reputation for delivering exceptional IT solutions and services to its clients.

The company has always been at the forefront of technological advancements, offering a wide range of services, including IT leadership, security, and cloud solutions. With a focus on delivering value and enabling digital transformation, Cyberlogic has helped hundreds of clients optimize their technology investments and transform their businesses.

Over the years, Cyberlogic has expanded its national and international footprint, serving clients across a range of industries, including the international maritime space. As part of Hyperclear, a global technology investment holding company, Cyberlogic continues to grow and evolve, always striving to deliver the best possible solutions and services to its clients.

Overview of core capabilities and focus on digital transformation

Cyberlogic is dedicated to helping businesses achieve digital transformation. The company's core capabilities are in IT leadership, security, and the cloud, and it has a proven track record of delivering outstanding results to its clients.

Cyberlogic's focus on delivering value and enabling digital transformation is reflected in its approach to working with clients. The company begins by creating a stable IT environment, followed by securing the environment and optimizing technology investments. Finally, Cyberlogic helps businesses transform their technology, enabling them to achieve their digital transformation goals.

Cyberlogic is a "technology agnostic" company that uses only the best and most appropriate solutions for each client's needs. With its partnerships with leading technology providers, such as Microsoft, Dell, and Gartner, Cyberlogic is able to offer clients the latest and most innovative solutions available.

Cyberlogic's commitment to digital transformation goes beyond its core services. The company's corporate social responsibility initiatives, such as the Cyberlogic Foundation and the Bright Start Education Foundation, demonstrate its commitment to making a positive impact on communities and helping to build a better future for all.

II. Our Services

IT leadership

Cyberlogic's IT leadership capability is focused on helping businesses to optimize their technology investments and drive growth through effective IT management. The company's team of experienced IT professionals provides guidance and support in a range of areas, including:

1. IT Strategy: Cyberlogic helps businesses to develop an IT strategy that aligns with their overall business objectives and goals.
2. IT Operations: The company provides support for IT operations, ensuring that systems are running smoothly and efficiently.
3. IT Governance: Cyberlogic helps businesses to establish effective IT governance processes that ensure compliance with regulatory requirements and promote best practices.
4. IT Project Management: The company's IT project management capabilities help businesses to plan and execute technology projects, ensuring they are completed on time, within budget, and to the required quality standards.

Cyberlogic's IT leadership services provide businesses with the support they need to maximize the value of their technology investments and drive growth through effective IT management.

Security

Cyberlogic's security capability is focused on helping businesses protect their data, systems, and assets from cyber threats. The company's team of experienced security professionals provides guidance and support in a range of areas, including:

1. Cybersecurity: Cyberlogic helps businesses to secure their systems and data against cyber threats, providing a range of cybersecurity services including risk assessments, penetration testing, and security audits.

2. **Data protection:** The company helps businesses to protect their sensitive data, ensuring that it is stored and processed securely in compliance with regulatory requirements.
3. **Compliance:** Cyberlogic helps businesses to meet regulatory requirements, such as PCI DSS, HIPAA, and GDPR, by providing guidance and support with compliance assessments and reporting.
4. **Incident Response:** The company provides incident response services to help businesses respond to and recover from cyber incidents, minimizing damage and ensuring business continuity.

Cyberlogic's security services provide businesses with the confidence they need to protect their data, systems, and assets from cyber threats and meet their regulatory obligations.

Cloud services

Cyberlogic's cloud capability is focused on helping businesses to fully leverage the benefits of cloud computing, from cost savings to increased agility and scalability. The company's team of experienced cloud professionals provides guidance and support in a range of areas, including:

1. **Cloud Migration:** Cyberlogic helps businesses to migrate their systems and data to the cloud, providing a range of services including planning, execution, and post-migration support.
2. **Cloud Management:** The company provides cloud management services to help businesses effectively manage their cloud environments, ensuring that systems are running smoothly and efficiently.
3. **Cloud Security:** Cyberlogic helps businesses to secure their cloud environments, providing a range of security services including risk assessments, penetration testing, and security audits.
4. **Cloud Optimization:** The company helps businesses to optimize their cloud environments, ensuring that they are fully leveraging the benefits of cloud computing and maximizing the value of their cloud investments.

Cyberlogic's cloud services provide businesses with the expertise they need to fully leverage the benefits of cloud computing, ensuring that their systems are secure, efficient, and cost-effective.

Focus on delivering value

Cyberlogic is focused on delivering value to its clients. The company believes that the key to delivering value is to understand the unique needs and goals of each business, and to provide tailored solutions and services that meet those needs.

To deliver value, Cyberlogic follows a customer-centric approach, putting the needs and goals of its clients at the center of everything it does. The company's focus on delivering value has helped it to build a national and international footprint of loyal clients who rely on it for transparent, straightforward guidance when it comes to streamlining their processes, growing their businesses, and securing their data.

Cyberlogic's focus on delivering value means that it only uses the best and most appropriate solutions for the problem, and it is committed to providing the highest quality services to its clients. The company is dedicated to helping businesses achieve their goals and transform their operations, and it works closely with each client to understand their unique needs and deliver the value they need to succeed.

National and international footprint

Cyberlogic has a national and international footprint, serving clients across South Africa, the UK, and Mauritius. The company's reputation for delivering value and exceptional service has helped it to build a loyal customer base that spans across multiple industries, including international maritime space (Uber and Superyachts).

Cyberlogic's national and international footprint has allowed it to expand its reach and provide its services to a wide range of businesses, helping them to optimize and transform their operations. By serving clients across multiple countries and industries, the company has gained a wealth of experience and expertise, allowing it to provide tailored solutions and services that meet the unique needs of each business.

In addition, being part of the global technology investment holding company, Hyperclear, has enabled Cyberlogic to further expand its reach and provide its services to businesses on a global scale. The company's national and international footprint allows it to provide the support and expertise that businesses need to achieve their goals and transform their operations, no matter where they are located.

III. Our Partnerships

Microsoft Tier 1 Direct Cloud Solutions Partner

As a Microsoft Tier 1 Direct Cloud Solutions Partner, Cyberlogic has demonstrated a high level of expertise and proficiency in delivering Microsoft-based cloud solutions. This partnership with Microsoft allows Cyberlogic to offer its clients a wide range of Microsoft cloud services, including Microsoft Azure, Microsoft Office 365, and Microsoft Dynamics.

Being a Tier 1 Direct Cloud Solutions Partner also means that Cyberlogic has access to the latest tools, resources, and support from Microsoft, enabling the company to provide its clients with the best possible cloud solutions and services. Additionally, Cyberlogic's partnership with Microsoft allows the company to stay at the forefront of the latest advancements in cloud technology, ensuring that its clients have access to the latest and most innovative solutions available.

Having this designation as a Microsoft Tier 1 Direct Cloud Solutions Partner is a testament to Cyberlogic's commitment to delivering high-quality, value-driven solutions and services to its clients. It also demonstrates the company's expertise in the cloud and its ability to deliver solutions that help businesses optimize and transform their operations.

Dell Gold Partner

Being a Dell Gold Partner, Cyberlogic has demonstrated a high level of expertise and proficiency in delivering Dell-based solutions. This partnership with Dell provides Cyberlogic with access to the latest tools, resources, and support from Dell, allowing the company to offer its clients the best possible solutions and services.

As a Dell Gold Partner, Cyberlogic has the ability to provide its clients with a wide range of Dell products and services, including servers, storage, networking, and security solutions. The company is also able to provide its clients with comprehensive support and maintenance services for their Dell-based systems.

The Dell Gold Partnership is a testament to Cyberlogic's commitment to delivering high-quality, value-driven solutions and services to its clients. It demonstrates the company's expertise in delivering Dell-based solutions and its ability to provide its clients with the best possible technology solutions and services. With this partnership, Cyberlogic is well positioned to help its clients optimize and transform their operations and take full advantage of the benefits of Dell technology.

Gartner Client

Being a Gartner client, Cyberlogic has access to Gartner's extensive research, analysis, and consulting services. Gartner is a leading research and advisory company that provides technology-related insights, advice, and tools to businesses around the world.

As a Gartner client, Cyberlogic can use Gartner's research to stay informed about the latest technology trends, best practices, and market insights. The company can also leverage Gartner's consulting services to help it make informed decisions about technology investments and to develop effective strategies for its business.

Gartner's research and analysis provides Cyberlogic with a comprehensive view of the technology market and helps the company stay ahead of the curve in terms of technology trends and innovations. This enables Cyberlogic to provide its clients with the best possible technology solutions and services and to help them optimize and transform their operations.

The Gartner relationship is a testament to Cyberlogic's commitment to staying at the forefront of technology and delivering high-quality, value-driven solutions and services to its clients. With this partnership, Cyberlogic is well positioned to help its clients stay ahead of the curve and take full advantage of the benefits of technology.

IV. Our Philosophy

Technology agnostic approach

Cyberlogic adopts a technology agnostic approach, meaning that they are not committed to using a specific technology or vendor. Instead, they believe in using the best and most appropriate solution for each client's needs.

This approach allows Cyberlogic to remain flexible and responsive to the rapidly changing technology landscape. It also means that the company is not limited by any particular technology or vendor and can provide its clients with the best possible solution for their needs, regardless of the technology or vendor.

Cyberlogic's technology agnostic approach means that the company is able to provide its clients with unbiased recommendations and solutions that are based on their specific needs and goals, rather than being limited by a particular technology or vendor. This allows Cyberlogic to deliver high-quality, value-driven solutions that help its clients optimize and transform their businesses.

In short, Cyberlogic's technology agnostic approach is about providing its clients with the best possible solutions for their needs, regardless of the technology or vendor, and delivering value and results that help them achieve their goals.

Best-of-breed technology

Cyberlogic's focus on best-of-breed technology refers to their commitment to using only the best and most appropriate technology solutions for each client's needs. This approach allows Cyberlogic to deliver high-quality, value-driven solutions that help its clients optimize and transform their businesses.

Best-of-breed technology refers to the technology solutions that are considered the best or most appropriate for a particular problem or application. These technologies are typically recognized as being the most advanced, reliable, and effective in their respective fields.

Cyberlogic's focus on best-of-breed technology allows them to provide its clients with the best possible solutions for their needs, regardless of the technology or vendor. This approach helps the company to remain flexible and responsive to the rapidly changing technology landscape, while delivering value and results that help its clients achieve their goals.

In short, Cyberlogic's focus on best-of-breed technology is about providing its clients with the best possible solutions for their needs and delivering value and results that help them achieve their goals, using only the most advanced, reliable, and effective technology solutions.

Transparent and straightforward guidance

Cyberlogic's focus on delivering transparent and straightforward guidance is part of its commitment to delivering value to its clients. The company understands that technology can be complex and overwhelming, and it is their goal to help clients navigate this complexity and simplify their technology investments.

Transparency and straightforward guidance is about being honest and open with clients, clearly communicating their options, and providing clear and actionable advice. This approach helps clients to make informed decisions about their technology investments and empowers them to take control of their technology environment.

Cyberlogic's focus on delivering transparent and straightforward guidance is also about being proactive and anticipating the needs of its clients. The company works closely with its clients to understand their business goals, assess their technology environment, and develop solutions that help them optimize and transform their businesses.

In short, Cyberlogic's focus on delivering transparent and straightforward guidance is about empowering its clients to make informed decisions about their technology investments, simplify their technology environment, and achieve their goals, with the help of clear and actionable advice from a trusted technology partner.

V. Corporate Social Responsibility

Cyberlogic Foundation and Cyberlogic Active brand

The Cyberlogic Foundation is a philanthropic arm of the company, and its goal is to promote social responsibility and contribute to the betterment of communities. One of the initiatives under the Cyberlogic Foundation is the "Ride for a Child" and "Run for a Child" campaigns. These campaigns are aimed at promoting fitness and wellness, while also raising funds for charity.

The "Ride for a Child" and "Run for a Child" campaigns are part of the broader Cyberlogic Active brand, which promotes the company's commitment to promoting active lifestyles and supporting social causes. The intention of these campaigns is to help raise funds for charity whenever sponsored riders or runners complete a recognized sporting event while wearing Cyberlogic Active gear.

The Cyberlogic Foundation also works closely with the Bright Start Education Foundation, promoting education and improving the self-confidence of local children. Through this partnership, hard-working learners from underprivileged communities are placed in schools that provide holistic support and guidance throughout their educational careers.

In conclusion, the Cyberlogic Foundation and Cyberlogic Active brand are part of the company's commitment to promoting social responsibility and contributing to the betterment of communities. Through initiatives such as the "Ride for a Child" and "Run for a Child" campaigns and its partnership with the Bright Start Education Foundation, the company is making a positive impact on the lives of those in need.

Ride for a Child and Run for a Child campaigns

The "Ride for a Child" and "Run for a Child" campaigns are part of the Cyberlogic Foundation's broader initiative to promote the Cyberlogic Active brand across multiple sporting disciplines. The purpose of these campaigns is to raise funds for charity whenever sponsored riders or runners complete a recognized sporting event in the Cyberlogic Active gear. This shows the company's commitment to corporate social responsibility and its efforts to give back to the community.

Partnership with Bright Start Education Foundation

The partnership between Cyberlogic and the Bright Start Education Foundation is aimed at promoting education and improving the self-confidence of local children from underprivileged communities. The foundation places hard-working learners from these communities in schools that provide comprehensive support and guidance throughout their educational careers. This partnership demonstrates Cyberlogic's commitment to giving back to the community and its focus on making a positive impact through its corporate social responsibility initiatives.

VI. Conclusion

Recap of services and focus on digital transformation

Cyberlogic is a Managed Solutions Provider with over 27 years of experience in the South African market. The company's core capabilities are in IT leadership, security, and the cloud. Their focus is on enabling digital transformation by delivering unquestionable value to their clients. They work with clients to create a stable IT environment, followed by a secured environment, and then optimize technology investments to eventually transform the client's business with technology.

Cyberlogic is a Microsoft Tier 1 Direct Cloud Solutions Partner, a Dell Gold Partner, and a Gartner Client. They take a technology agnostic approach and believe in using only the best and most appropriate solution for the problem. They have a national and international footprint, serving clients across most industries, including the international maritime space.

The company's commitment to corporate social responsibility is reflected in its Cyberlogic Foundation and its "Ride for a Child" and "Run for a Child" campaigns, as well as its partnership with the Bright Start Education Foundation. These initiatives demonstrate Cyberlogic's focus on making a positive impact on the community and its efforts to promote education and improve the lives of local children.
